

## Certificates

PhotExResults and PhotoCompResults can send and email to entrants containing certificates for their entries that won awards and, for exhibitions, that were accepted.

The format of the certificate is fixed and cannot be amended.

<b>A Camera Club</b>	← Organisation data
<u>120<sup>th</sup> International Exhibition</u>	← Exhibition title
<i>Some wonderful image</i> by	← Image title
<i>An Entrant a/FIAP</i>	← Entrant full name
was awarded	← See note 1
The Fred Smith selectors medal	← Award name
in the Open PDI section	← Medium and class
	← Image sized to fit

### Note 1

If the award name contains “Commended” or the award is marked “Commended”, text says “was”. Similarly, if the image was accepted but gained no award, the text says “was”

### Note 2

The placeholder %judge1 is replaced with the judges’ name

### Note 3

The text size will change to fit each element on one line

The certificate is designed to be printed at a size of 4 inches by 6 inches at 300dpi, but this can be modified in the printing process.

## Usage notes

PhotoCompResults and PhotExResults each have a “Send certificates” button. This allows you to choose to send certificates for

- Award winning entries
- Commended entries

And for exhibitions

- Accepted entries

If you choose not to send Award certificates to award winners, they will receive an acceptance certificate instead (and similarly for commended entries).

Each qualifying entrants receives a single email containing all their certificates as attachments.

The certificates are sent separately from results because some entrant’s email systems may block emails containing image attachments. If you are sending certificates, consider not including thumbnail images in the results emails (see PhotEx Settings/Email tab).
